CLB18

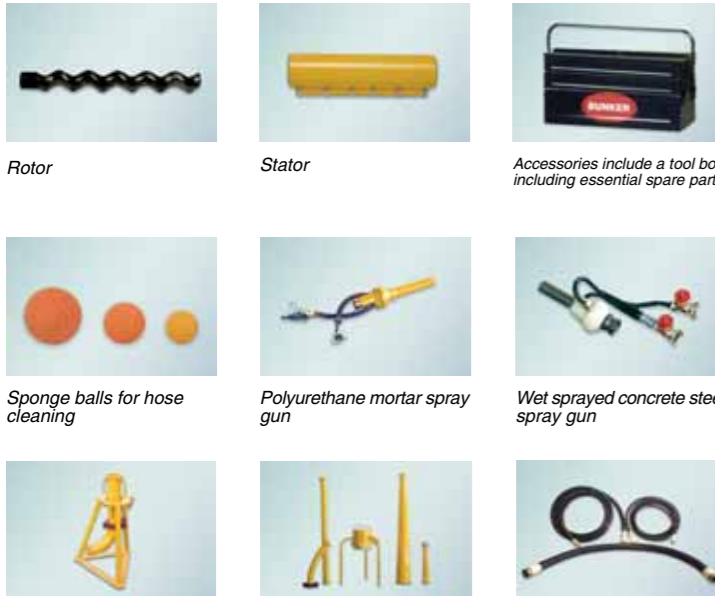

Self-levelling floor screed pump

CLB18

Pump Spray Inject

Accessories

Rotor

Stator

Accessories include a tool box including essential spare parts

Sponge balls for hose cleaning

Polyurethane mortar spray gun

Wet sprayed concrete steel spray gun

Steel or rubber hoses of different diameters and lengths, accessories such as the hose holder, the discharge hopper allow you to use the machine for all applications. They will optimise the performances of your CLB18.

Technical data

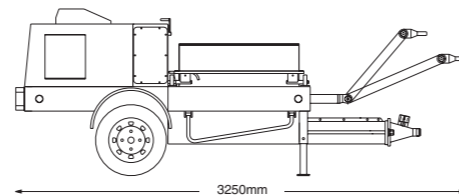

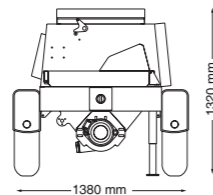

Diesel Kubota 4 cylinders engine	26,5 kW
Screw pump	2 L8
Maximum theoretical output *	18 m ³ /h
Maximum theoretical pressure	25 bar
Max. granulometry	16 mm
Horizontal pumping distance *	200 m
Vertical pumping distance *	50 m
Hopper capacity	200 l
Air compressor	400 l/min
Weight	750 kg

* Depending on material, its consistency and hoses diameter.

The CLB18 is the innovative screw pump for self-levelling screeds designed by Bunker to satisfy your requests ensuring high productivity and easy control.

Perfect for self-levelling floor screed

BUNKER Building Pumping Technologies

BUNKER

Compressor

Wireless remote control

The CLB18 is equipped with a remote control with electric wire to start and stop pumping. A wireless remote control is available on demand.

High pressure cleaner

Car wash

With its many optional accessories as its wireless remote control, its high pressure cleaner, its 400 l/min compressor, its cleaning kit, the CLB18 is definitely a unique machine and one of the most modern on the market.

Controls

It's very easy to operate in either forward or reverse enabling the pressure in the hoses to go down in case of clogging.

Pumping output control

Gradual output control ensure precise pumping and spraying avoiding waste of material.

CLB 18 Powerful and polyvalent

Its weight 750 kg

The CLB18 is an innovative screw pump for self-levelling screeds designed by Bunker to satisfy modern floor layers' requests. Its theoretical output is 300 l/min and its maximum pumpable grain size is 16 mm, the CLB18 ensures high productivity and safety pumping easily at amazing distances.

It pumps and sprays:

- cement-based or anhydrite-based self-levelling floor screed
- mortar
- light concrete with polystyrene
- self-compacting concrete
- fluid fibre-reinforced concrete
- wet sprayed concrete

Its small dimensions and its weight under 750 kg allow you a safe towing on roads and motorways even at 120 km/h and facilitates on-site positioning. With its resistant Alko tow bar, you'll tow it easily even at high speed.

Technologically advanced

Its Kubota 4 cylinders engine is ecological and powerful (26,5 kW) with E-TVCS system. Its engine slowdown system, its radiator and hydraulic pump with variable output reduce fuel consumption, improve its performances and parts' lifetime.

Conformity to safety regulations

The CLB18 has been created to work in heavy-duty conditions guaranteeing the operator's safety. The automatic screw stop, the emergency stop button, the control levers with safety block, light diodes and sound alarms ensure a perfect control of the pump.

Pump with output control

A very efficient radiator

When you'll stop pumping, the engine will slow down automatically which reduces fuel consumption and noise emission.

Start pumping mortar and self-levelling floor screeds, spraying concrete with the CLB18 it's so easy!

Easy to tow

Easy to use
